A Gallery of 147 Partner Applications/ Programs which use your family tree data from FamilySearch
All to help make FH a little easier and more engaging...

How to find it? – go to <https://familysearch.org/apps/>

Or find at the bottom of the FamilySearch Homepage and click App Gallery

Organized into 10 Categories –

Relative Finder <https://www.relativefinder.org/#/main>

It is an easy and fun way to find your famous relatives as well as those who you might be related to, among your neighbors, friends and associates.

RelativeFinder is a program that was developed by Brigham Young University.

It extracts genealogical information from FamilySearch collaborative family trees, compares them over the past 16 generations to a list of illustrious world figures, and shows you how you are related to them.

You do not have to be a member of the LDS Church to use FamilySearch or RelativeFinder.

You can set up groups to which you can invite people. That way you can see how you are related not just to famous people, but to your friends, neighbors, and coworkers.

Inviting Others – Go to Manage Groups... **copy Invite URL... paste into email plus include the password**

Defining Cousins

Your **uncle** is the brother of your father or mother. Your **aunt** is the sister of your father or mother.

Your **great uncle** (or grand uncle) is the brother of your grandfather or grandmother.

Your **great aunt** is the sister of your grandfather or grandmother.

Your **first cousin** is the child of your aunt or uncle.

Your **second cousin** is the grandchild of your great aunt or great uncle. (If two people are first cousins, the children of each of the people will be second cousins.)

Your **third cousin** is the great-grandchild of your great-great uncle or great-great aunt. (Children of 2nd cousins, are 3rd cousins to each other.)

If someone is your first cousin, then his or her child is your **first cousin once removed**. (Once removed means one generation level different from you.) All your regular cousins (first, second, etc.) are at the same generation level as yourself. **Those at different levels are "removed"**

Your second cousin once removed is the child of your second cousin. Your first cousin twice removed is the child of your first cousin once removed (i.e. the grandchild of your first cousin). Your second cousin twice removed is the child of your second cousin once removed (i.e. the grandchild of your second cousin). **REMOVED COUSINS:** Count how many generation levels they are apart. This is the number they are "removed."
