

Finding New Relatives by Sourcing

Janice L. Cushman, Emeritus AG®

As records are sourced, we often find more relatives. This class will focus on how to attach record sources in FamilySearch and what to look for that will lead to finding other relatives. Both the built-in FamilySearch sourcing tool and the third-party tool, RecordSeek, will be demonstrated. Although the class will focus on sourcing in FamilySearch, the same techniques can be applied on other genealogical sites.

Picking the Low Fruit

- Use the 'Record Hints'

Look for the Record Hint symbol in the Tree View

Finding More Sources on FamilySearch

- Use FamilySearch search on the Person View page.

- Attach FamilySearch historical records to people in Family Tree.
<https://www.familysearch.org/ask/salesforce/viewArticle?urlname=Attaching-Historical-Records-to-an-Entire-Family-Beta&lang=en>
- Put documents as sources in FamilySearch Family Tree.

Sources from other Websites

- Source manually or use 'RecordSeek' from RecordSeek.com
 - o Before using 'RecordSeek' for the first time, go to <https://recordseek.com/> and drag the 'RecordSeek' button to your bookmark or favorites bar.
 - o When you find a record to save, copy the index.
 - o Have the image (if there is one) in your browser window.
 - o Click the 'RecordSeek' bookmark and select either FamilySearch or Ancestry as needed.
 - o Paste the index into 'Describe the Record' and improve the title if desired.
 - o To put it in your 'Source Box' in FamilySearch, select 'Save Now, Attach Later'.
 - o To continue attaching, tag the appropriate events and click 'Next'.
 - o Add the PID# from FamilySearch and click 'Next'.
 - o Click 'Create & Attach'. After it is attached you will be able to 'Attach to Another'.
